CURIOUS, MOTIVATED, SOCIABLE, FLEXIBLE AND SOLUTION-FOCUSED.

After two years of work-study, I would like to deepen my learning in the field of Cloud and cybersecurity by joining EPITECH on a work-study program as part of an MSC PRO.

Experiencing the professional world for two years has enabled me to strengthen my ability to adapt by regularly changing teams and missions.

I also learned how to organize myself in the face of a heavy workload, as I developed a self-employed managed services business at the same time.
